

Calendar View

Properties related to the calendar view are located in the Calendar View group.

CalendarCustomSortMember	The field that should be used for sorting displayed data.
CalendarDateDueMember	Date due field.
CalendarDateFromMember	Date from field.
CalendarDateToMember	Date to field.
CalendarDescriptionMember	Description field. Content is shown in the tooltip of the event.
CalendarIsFinishedMember	Not implemented.
CalendarNameMember	Name field. Content is shown as a description in the cell representing the event.
CalendarResourceIdMember	Resource field.
CalendarResourceNameLookupField	Not implemented.
CalendarRowHeight	Calendar row height coefficient. By default the calendar view uses a basic value from metrics. It is possible to force the calendar to use wider rows by specifying row height coefficient.
CalendarShowAllResources	By default the calendar view displays only resources with some event assigned to them. If this property is set to true, all resources will be displayed.
DefaultCalendarView	In what type of view should the calendar view display the data (daily view, weekly view, monthly view, etc.).
IsCalendarSupported	If true, the calendar view is added to a screen section and the icon for the calendar view is available in the toolbar.
IsCalendarVisible	If true, the calendar view is set as a default view.

The Minimum working configuration is the following: The property `IsCalendarSupported` is set as true and properties `CalendarDateFromMember`, `CalendarDateToMember`, `CalendarNameMember`, `CalendarResourceIdMember` are set.
