

# Default Value Parameter

Default Value Parameter is a type of a [report parameter](#) that uses an already predefined default value saved as a [data constant](#).

## ATTRIBUTES

|                     |  |
|---------------------|--|
| <b>AllowsNulls</b>  | Default value is set to <code>True</code> .  |
| <b>DataLength</b>   | Depending on the data type fill in the desired data length, e.g. 8 for a date or 100 for a string. |
| <b>DataType</b>     | Select the <a href="#">data type</a> of the parameter.   |
| <b>DefaultValue</b> | Select the data constant you want to use as a parameter.   |
